

SAP Migration in MyRepublic

To obtain benefit of high availability and robustness of Cloud Data Center, MyRepublic decided to migrate their existing physical SAP datacenter to Google Cloud solution. Smartfren helped MyRepublic for the migration and implementation of SAP on GCP.

The challenge

The challenge for SAP data center is the solution must cover horizontal and vertical aspect of scalability, and also flexible for future technology expansion. On the otherside SAP data center must have high operational availability and disaster recovery solutions.

The solution

Smartfren delivered SAP on Google Cloud solutions to fulfill PT.Eka Mas Republik needs, resulting in a modern High Availability infrastructure, a flexible GCP Cloud Computing solutions, and Actifio Go cloud backup and disaster recovery solution.

The results

Smartfren successfully delivered end to end solutions to PT. Eka Mas Republik, for the needs of SAP migration from physical data centre to Google Cloud, resulting in a modern high availability and scalability infrastructure collaborated with advanced cloud backup and disaster recovery system.

Smartfren successfully delivered SAP on Google Cloud solution, resulting in a modern high availability and scalability infrastructure, with advanced cloud disaster recovery system.
