

# PT AIForesee Inovasi Skor – Google Cloud Platform

To orchestrate the container based application in the fast pace development cycle and comply with the Indonesia government regulation, AIForesee is leveraging Google Kubernetes Engine from Google Cloud Platform region Jakarta, Indonesia.

## The challenge

AIForesee needs an agile and reliable platform to manage and orchestrate a number of container based applications and to comply with the regulation as well.

## The solution

AIForesee activated the Compute Engine and Kubernetes Engine. Other components activated were Cloud DNS (Domain Name System), Cloud Storage, and Stackdriver Logging.

## The results

Leveraging Google Kubernetes Engine and utilizing the auto-scaling feature, AIForesee improved its app development time, performance, and scalability. It enabled AIForesee to produce a stable, modular, and scalable solution for their customers.

“ Google Kubernetes Engine on Google Cloud Platform helped AIForesee to improve development and deployment efficiencies, achieve faster time to market, and to comply with Financial Services Authority Regulation ”

Christian Limawan, Director, PT AIForesee Inovasi Skor
