

• Dawn Foods B2B Platform: GCP Security Continuous Compliance

- Epam implemented from the scratch online shop platform using cloud technologies. - In our work we used 5 development environments - their hardening was completed in order to avoid leakage caused by misconfigurations.

The challenge

Lack of automated service for GCP security state monitoring included the appropriate security metrics/indicators system and in-built notification process.

The solution

Google Cloud was used for our toolkit deployment. In addition, our toolkit was designed for continuous scanning of GCP services.

The results

- Continuous auto-detection of cloud security state; - Automated risks deduplication and keeping of cloud security risks map up to date; - Instant notification of new risks appearance.

Family-owned global bakery supplier, which partners with culinary experts to deliver the ingredients and finished baked goods, faced with lack of automated service for their GCP security state monitoring including the appropriate security metrics/indicators system and in-built notification process.
