

People People People - Workspace Transformation

APPS People, with their expertise, handled negotiations for the contract, migration, and merge of multiple Microsoft and Google instances into one consolidated tenant. We facilitated the process, projected and executed the successful merger.

The challenge

Collaboration between multiple entities in the group over multiple different tenants was both cumbersome and problematic. Being able to merge all on the same platform improved collaboration, safety, and the ability to manage the collaboration infrastructure across the group. Moreover, it streamlined communication, fostered knowledge sharing, and enhanced productivity, leading to greater efficiency

The solution

To provide a solution for our customer, we utilized the Google Cloud Platform to drive the data migration infrastructure. Leveraging Google Workspace's best practices for onboarding, user analytics, and delivery, we were able to seamlessly migrate our customer's data from Microsoft 365/Google to a single Google Workspace Tenant.

The results

PeoplePeoplePeople effectively consolidated multiple instances of Google Workspace and Microsoft 365 into a single Google Workspace tenant, resulting in enhanced administration, collaboration, and cost savings for their collaboration platform throughout the group. By unifying users on a common platform, communication barriers were eliminated, fostering productivity across the group.

“ Several times during our migration process, I have internally bragged about how fantastically competent, friendly and accessible AppsPeople are. We had several complicated migrations that went perfectly!

”

Markus Tibruzi, Team Director & Co-founder, PeoplePeoplePeople

About People People People AB

A growing home for agencies across the Nordics. We are here to make running an agency as smooth as possible. From handling finance to freelance we are building a system that frees up the time and minds of our people. So they are free to do the work of their lives.

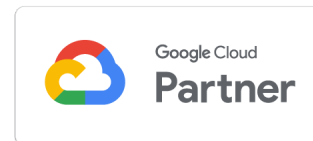

Industry: Advertising & Marketing

Primary project location: Sweden
