

Sinar Mas Mining - Google Cloud Platform

Migrating the client infrastructure workload from existing on-premise infrastructure to Google Cloud Platform and providing technical support whenever needed.

The challenge

Using traditional infrastructure on premise Data Center is challenging and costly. The procurement of hardware and software can take time. During the COVID-19 pandemic it even gave more issues due to lack of mobility and human interaction.

The solution

Remotely deploying Google Cloud Platform to speed up the provisioning of new infrastructure.

The results

The client can provision resources whatever and whenever needed easily. IT infrastructure cost also can be reduced. Dodi Andika, Cloud Expert Specialist Sinar Mas Mining, says, "Since the provisioning of the Jakarta Region we have been taking full advantage of Google Cloud Platform. GCP provides services that are not only rich in functionality but also secure, affordable and easy to use."

“Technology in Google Cloud Platform keeps our team updated with the latest technology. Google Cloud Platform offers service flexibility and easy integration, elevating our engineers to the next level.”

Dimas Sutejo, Head of IT Application & Operation, Sinarmas Mining
