

Altadia Group increases its flexibility with SAP in GCP

The Altadia Group chose SoftwareOne as a partner because of the trust that a decade-long relationship brought. After a successful proof of concept, they coordinated the work with the other teams involved. The user only noticed an improved performance

The challenge

The group's objective has been to continuously adopt the latest technological innovations, implementing solutions that involve the greatest modernization. In 2021, faced with the need to virtually duplicate its systems due to the merger of the companies that now form part of the Altadia Group, it began a phase of analysis of possible alternatives for hosting Altadia Group's new SAP environment.

The solution

SoftwareOne and Google Cloud proposed a proof of concept. In less than a week they had a test environment in place for metrics and performance comparisons. The results improved the performance of their current on-premises environments, giving them the flexibility to test different machine types, models and scenarios, without losing anything compared to testing with other clouds.

The results

Flexibility: SAP Netweaver and GCP virtual machines that can scale up or down as needed; Security: Encrypted global network that ensures better end-to-end SAP performance; Zero downtime for virtual machine maintenance; Innovation: Data Warehouse as a Service that enables data mining, application of Machine Learning to processes and exposes SAP functionality with APIs; Cost benefits.

“ The ability to grow and scale flexibly was key to our decision, as well as the peace of mind and confidence in the process thanks to the SoftwareONE and Google Cloud team. ”

Ernesto Plaza, Altadia Group CIO

About ALTADIA GROUP

Altadia Group was born from the merger of Esmalglass-Itaca-Fritta and Ferro's ceramic division in 2021. With more than 3,600 employees in 32 production plants and 19 distribution and after-sales service centers in 19 countries, it is a world leader in the sector of frits, glazes, colors, and inks for the ceramic floor and wall tile industry.

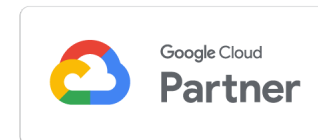

Industry: Manufacturing & Industrial

Primary project location: Spain
