

CoreCloud[®] charts

AN EHR YOU'LL LOVE TO USE

Work smarter, not harder to drive better outcomes and improve your patient's experience.

Engaging with your patients and ensuring they get the highest quality of care is your #1 priority, and you trained to be a physician, not a data-entry clerk. Although you're working hard to achieve this, the tools at your disposal get in the way with inefficient workflows and repetitive tasks. With CareCloud Charts your clinical workflows will be more efficient and your patient experience will be more engaging.

Boost Productivity

Every tool you need, one click away - from managing patients to charting-by-exception, order sets and ePrescribing. Reduce documentation time over 25% thanks to intuitive workflows and multiple input options, and customize specialty-specific templates to fit your unique needs.

Improve Outcomes

Built-in intelligence and clinical-decision support tools like drug-drug interactions and reporting improve outcomes. Take action faster with information at your fingertips to provide relevant care during an encounter, and engage with patients through the integrated patient portal.

Embrace Value-Based Care

Personalized guidance and dashboards for data collection and reporting ensure you meet or exceed requirements, including for MIPS. And seamless integration of optional population health solutions into the clinical workflow improves quality of care and patient engagement.

"My other system was saddled with screens and checkboxes...With CareCloud a complex visit that would probably take 10-15 minutes to type out I document with just a couple of keystrokes, that's it"

-Dr. Sesin, Vanguard Group

25% FASTER DOCUMENTATION

96% REVENUE REALIZATION RATE

KEY FEATURES

✓ Faster Charting

A whole suite of time-saving features including order sets, configurable templates, intelligent task management, shortcuts and macros, and specialty-specific workflows

✓ Multiple Input Options

Chart by exception, use macros, or dictate your notes to make your clinical workflow match your preferences

✓ Seamless Integration with PM and PXM

Charts is one part of CareCloud's cloud-based platform alongside Central PM and Breeze patient experience management

✓ Streamlined MIPS Reporting

Integrated dashboard makes it easier than ever to collect data for measures, evaluate the quality and score, benchmark against others, and submit - all from a single screen

✓ Personal, Friendly Help

Supported by a team of expert client managers and US-based technical support to get the most out of all of Chart's features

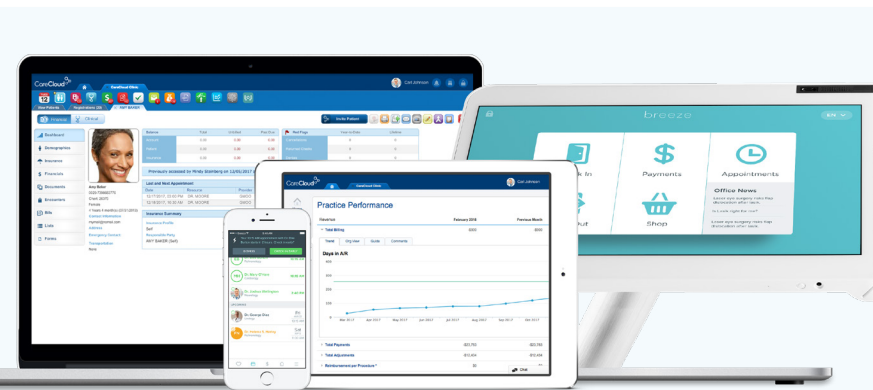

✓ Available Anytime, Anywhere

Access Charts from any web browser, on PCs or Macs, without any on-premise servers or proprietary hosted infrastructure

ENSURING A SMOOTH TRANSITION

Moving to CareCloud unlocks a number of opportunities to improve practice performance, from the moment your dedicated implementation specialist team is assigned, through the world-class data migration process, and the continued personal support through go-live.

At CareCloud we understand the value and importance of your information, and how critical it is your business and the care you provide to your patients. However, we see data migration as an opportunity: to fix bad data, to merge patients into a master patient index, and to structure it in a way that unlocks the full value of your investment.

The #1 Platform to Grow Your Practice

CareCloud Charts is part of CareCloud's award-winning cloud-based platform that covers practice needs from payers to patients, and everything in between

#1 CLOUD-BASED EHR
