Ramky Infrastructure Limited

Cloud4C's consultative approach strengthened the partnership, delivering best-in-class business aligned solutions. We configured & managed the google cloud Infrastructure for the client, leveraging our in depth cloud expertise

The challenge

Rapid Business Growth Demanding Scalable and Advanced Infrastructure Redundancy Management for Business Continuity Time Intensive Infrastructure Management Reducing Focus on Business Expansion

The solution

Cloud4C leveraged Cloud Adoption Framework (CAF) to analyze the complexity and cloud readiness of applications and workloads. Post analysis, we selected Google Cloud Platform (GCP) to deliver optimum results and accelerated performance

The results

30% reduction in TCO with committed use and zero capex for cost optimization 99.9% uptime with single SLA upto application login layer ensuring application availability Scalable and reliable architecture on GCP, aligned to business needs Swift and frictionless migration with Cloud4C migration factory approach Seamless infrastructure management powered by AIOpS managed services

> 24*7 monitoring ensuring zero downtime and high security for the landscape End-to-end Intelligent Managed Services for GCP Our 7 reg tech framework and 40+ security tools were key in safeguarding the infrastructure from spiteful incidents The applications performed at a peak, delivering 99.9% uptime, governed by a single SLA up to application login layer.
