

## Topvalue-Infrastructure Modernization

Resell, consult and complete deployment

### The challenge

Topvalue needs to use Google Cloud Platform Infrastructure for its website topvalue.com to increase the efficiency of the E-Commerce system to be able to support the increasing workload while maintaining manageability.

### The solution

Tangerine team started implementation from the foundation to prepare the landing zone and install software prerequisites. Team provided guidance on the migration application process as well as tested the system to make sure it works before going live and provided the support after implementation. Team deployed compute engine and docker engine on GCP. At the end, Team conducted training sessions.

### The results

The solution offered by Tangerine is Lift and Shift Migrate to move the workload to the Google Cloud Platform, which is a solution that minimizes changes resulting in a short time implementation, meeting the needs of TopValue, allowing customers to visit the website topvalue.com with good response time. The system is working efficiently and is able to support more traffic.

“Tangerine provides excellent service and support using the Google Cloud Platform. including providing advice and information that is complete and fast.”

Perawas Suksamran, Project Manager, Topvalue Corporate Ltd.
