CloudMile Partners with NTU to Nurture New-Gen Cloud Talents

CloudMile offers a series of Google Cloud authorized training courses on cloud infrastructure, big data analytics, machine learning and AI/ML. These courses cover both fundamental concepts and practical implementations.

The challenge
Due to the current digital transformation and gen AI development, the College of Management decides to works with CloudMile to foster next generation cloud & AI talents.

The solution
CloudMile technical trainers delivered cloud courses that included an introduction to Google Cloud, identity and access management, compute, storage, networking services, containerization, and logging & monitoring. It also includes benefits of building a big data pipeline and machine learning models with Vertex AI on Google Cloud.

The result
The courses were delivered to 11 students from the College of Management and CloudMile received 4.8/5 & 4.9/5 CSAT score. Trainers are highly acknowledged by students stating the courses are well addressed and labs solidify their learnings on GCP solutions such as IAM, BigQuery implementations.

> " For students, CloudMile's cloud computing courses with hands-on labs not only allow them to grasp the latest industry trends, but also enable them to learn and grasp technical skills, such as cloud and machine learning from a business decision-making perspective, which will be beneficial for their future "
