

Prefeitura Municipal de Passo Fundo/RS

IPNET led the management and technical execution of activities related to the migrations of the client's 1524 accounts. Project included technical alignment meetings, phased migration, domain and tool configurations and change management.

The challenge

Some of the objectives of migrating email from Zarafa to Google Workspace were to improve security, productivity and mobility at Passo Fundo City Hall, transforming the way employees collaborate in a better and faster way.

The solution

Passo Fundo City Hall chose Google Workspace to change its email environment, moving from a provider that provides basic functionalities (such as email, calendar and scheduling) to a more collaborative and modern scenario, full of resources for development and facilitating daily work. To carry out the migration and respective histories of the 1524 accounts, the IMAPsync tool was used.

The result

The migration to Google Workspace allowed the client to expand resources and capabilities of work tools. The improvement of collaboration and communication between employees, streamlining internal procedures and information management was noticed, ensuring the maintenance of technological updates, and generating a more efficient environment. stablee, safer and with ample storage capacity.

“With IPNET's management, we went through a period of platform migration smoothly and without major complications, organizing the new environment, guiding our users and disseminating new possibilities that were presented to us. A great gain for our municipality, for employees and citizens.”

Juliana Pedra - IT Coordinator

About Prefeitura Municipal de Passo Fundo/RS

Passo Fundo City Hall, located in the State of Rio Grande do Sul, plays a central role in municipal management, coordinating essential public services in areas such as health, education, infrastructure, transport, culture and urban development.
