

Carrefour Assurance Modernizes IT with Google Cloud

Project management & technical migration

The challenge

Carrefour Assurance is seeking to modernize its information system by migrating servers and applications to the Google Cloud environment. The primary objective of this project is to identify a reliable service provider capable of furnishing Carrefour teams with the necessary Google Cloud Platform infrastructure to host these applications. Compute Engine has been selected for this migration.

The solution

Devoteam played a crucial role in Carrefour Assurance's Landing Zone project, encompassing a technical scope of 99 virtual machines, 2 physical servers, 21 services, and 22 applications. Devoteam's involvement extends throughout the entire project lifecycle, from assessment and preparation to planning and implementation.

The result

Carrefour Assurance's Landing Zone project was a success! Devoteam expertly migrated 99 VMs, 2 physical servers, 21 services, and 22 apps to GCP. Seamless teamwork and planning ensured smooth integration with Carrefour Groupe's guidelines. This project highlights Devoteam's cloud migration expertise and client-focused approach.

“ I was impressed with Devoteam during our VMware to Google Cloud migration. Their expertise and proactive approach ensured the project was completed smoothly and on time, with minimal disruptions. The team was professional, responsive, and committed to delivering quality results. ”

Olivier ROGOVITZ

About Carrefour assurance

Carrefour Insurance, a Carrefour Group subsidiary, provides comprehensive insurance solutions for individuals and families. They offer home, auto, health, and life insurance plans, prioritizing affordability and extensive coverage.
