

SKLD seeks to deliver retail Transformation with Google Cloud

Pawa IT Solutions provided both rapid deployment support as well as change management support that allowed the SKLD staff to be onboarded and ramped onto Google Workspace in less than 2 weeks without any data loss and downtime.

The challenge

SKLD faced challenges related to communication and collaboration for its workforce. SKLD needed to modernize its email and communication platform to support its transformation strategy. The existing legacy platform was outdated and had security, capacity, and reliability challenges.

The solution

Pawa IT Solutions reviewed the technical and solution needs of SKLD and recommended Google Workspace. By fixing the perennial issues of reliability and security of the business email with Gmail for Business, SKLD was convinced that Google Cloud was the right cloud for their transformation needs. SKLD fully explored the other applications; Google Drive, Google Meet, and Google Chat and were pleased.

The results

"The peace of mind that the security & reliability of Gmail brought to the ICT team is immeasurable. The Integrated Gmail has made the user experience great." Babatunde Olasoji, IT Manager. "Our team is happily collaborating with each other and getting work done efficiently using the various tools available on Google Workspace." Tayo Osiyemi | Deputy Managing Director.

“Our transition to using Google Workspace was literally therapeutic coming from our previous solution, thanks to the PAWAIT team. We had significant anxieties over the potential interruption to workflow during the transition but the experience was totally different. We didn't skip a bit and the training and support were professionally delivered. ”

Tayo Osiyemi, Deputy Managing Director, SKLD
