

CZECH NEWS CENTER a.s. - Google Workspace Enterprise Plus Upgrade

AppSatori, Google Cloud Partner, partnered together with CZECH NEWS CENTER a.s. to unlock the full potential of Google Workspace. AppSatori's main role was to make sure that the communication runs smoothly and the upgrade is as quick as possible.

The challenge

CNC was originally using G Suite Basic (Google Workspace), but since the amount of licences was growing rapidly, it was necessary to upgrade to a more suitable version of Google Workspace. After a few online meetings we decided that it would be best to choose Enterprise Plus. At the time CNC had around 1200 licences and it was crucial to keep data secure and, due to COVID, let teams work remotely.

The solution

CNC is digitally transforming their business and Google Workspace is helping them to do so. Enterprise Plus seemed like the perfect solution for everything that CNC needed. Higher security to their data with Data Loss Prevention or Information Rights Management, which can forbid sharing sensitive data. CNC also asked for better video conferencing tools which were provided via Google Meet tools.

The results

The main result of this upgrade is a shift in the digital transformation of this entire company. Teams can work remotely but still together thanks to shared team Drives. Google Meet allows CNC to have online meetings for up to 250 attendees. They can use tools such as noise cancellation or custom backgrounds and other benefits such as Connected Sheets, S/MIME encryption or unlimited cloud storage.

“Upgrade to Enterprise Plus was one of the very good IT decisions we have made this year. Google Workspace is helping us with the digital transformation of our whole company. Easier manageability, huge amount of tools that help us with remote work and security - those are the main advantages that Google Workspace brought us,” says Emanuel Hosnedl, the CIO of CZECH NEWS CENTER a.s. ”
