HotelRunner- Google Workspace Platform

Oredata played an important role in guiding and supporting the client throughout the implementation and adoption process. They provided expertise in Google Workspace, assisted with configuration and training, and offered ongoing technical support.

The challenge

As a leading global tech company, the main challenges facing HotelRunner in its high precision and speed-demanding business operations were communication bottlenecks, scattered data, and inefficient collaboration. As a result of this environment, managing multiple email platforms and fragmented workflows poses an obstruction to productivity and decision-making.

The solution

With Google Workspace, HotelRunner enjoyed the efficiency of a unified communication platform, including Gmail, Calendar, and Meet, fostering seamless collaboration and real-time information sharing. The cloud-based storage and collaboration tools, such as Drive and Docs, enabled teams to work together on documents simultaneously, efficiently and enhanced productivity.

The result

Google Workspace implementation brought remarkable results for HotelRunner. Streamlined communication and collaboration enhanced productivity while speeding up the decision-making process.Teams experienced the needed efficiency through real-time collaboration on documents, eliminating version control issues. With Google Workspace, HotelRunner achieved cost savings and minimized IT support calls.

> As a global tech pioneer with an international team and offices in different continents, HotelRunner uses Google Workspace to seamlessly operate across borders. Thanks to the real-time collaboration and unified communication features, our far-flung teams achieve unmatched efficiency, productivity, and insight, eliminating silos and transforming how we work smarter worldwide.
