Global Infra Tech: Elevating Blockchain Services Via Innovation

Europe Cloud was instrumental in Global Infra Tech's project by providing expertise in cloud architecture & infrastructure management, supported the GCP migration and all cloud integrations, & ensuring security, scalability, & cost-effectiveness.

The challenge

Global Infra Tech faced various challenges such as appropriately addressing security risks, regulatory compliance, scalability, performance, cost control, and integration hurdles. They were required to assess, enhance, and invest in their cloud infrastructure, establish strong security measures, manage costs, guarantee scalability, and incorporate various cloud solutions with their existing setup.

The solution

Global Infra Tech overcame all their challenges, by partnering with Europe Cloud. By working together, they successfully mapped (using Stratozone) & migrated Global Infra Tech's entire infrastructure to GCP, utilising robust & scalable services such as Compute Engine, Cloud Storage, GKE & Networking, while resolving all issues related to security & ensuring stability.

The result

Ultimately, Global Infra Tech optimised their cloud infrastructure and met all their business needs, while ensuring security, compliance, scalability, and cost-effectiveness, thus providing their customers with reliable and high-quality cryptocurrency-related services, helping them stay competitive in the rapidly growing and evolving crypto market.

> **"** Partnering with Europe Cloud and migrating to GCP has been a game-changer for Global Infra Tech. Their expertise helped us overcome numerous challenges, allowing us to optimize our cloud infrastructure, ensure top-notch security, & maintain scalability. We'll confidently continue delivering exceptional, reliable cryptocurrency services to our customers, remaining competitive in this dynamic field. **"**
