

Improving Collaboration and Enhancing overall Data Security

Pluto7 helped the customer transfer all the emails associated with the existing domain to the new domain and also gave additional good technical support

The challenge

Previously, Goodbrick Realty Private Limited was using Google Workspace for mailing solutions for 21+ users for different domains. Due to some internal problem, they bought the new domain and changed the company name, for which they wish to transfer all the emails associated with the existing domain to the new domain

The solution

The tools in Google Workspace in comparison to other solutions are way more simple, agile, flexible, and user-friendly along with guaranteed uptime from Google-enabled smooth mail transactions for the employees. Google Workspace Admin console includes different features which enable different compliances, strengthen security, bring out reports, and effectively secure overall company data.

The results

The customer was able to achieve collaboration and improved data security with the solutions Pluto7 provided to them along with additional technical support.

Pluto7 assisted the customer in achieving complete data security leading to enhanced collaboration and productivity
