iSurvey: Tokio Marine Safety Insurance (Thailand) PCL

Loxley Orbit developed application for Insurance Company to serve motorist when encountering car accidents. The system dispatch surveyors when accident occurs and let surveyors instantly inspect the damage and send data directly from mobile device.

The challenge

With the competitiveness in Motor Insurance market in Thailand grew higher than ever. Tokio Marine Safety Insurance (Thailand) PCL. ("TMSTH") needs to offer outstanding distinctive products and services with efficiency to stay ahead of other insurance companies.

The solution

The sophisticated all-in-one motor insurance claim system (iSurvey application) was created on Google Cloud Platform, making the most of the scalability and high availability features of Compute Engine, CloudSQL, Cloud Storage and Google Maps APIs.

The results

iSurvey system has been identify as critical solution on motor claim notification process for TMSTH. Both insurance company and its clients enjoy the swiftness, all digitized and secured services offered by the iSurvey Application hosted on Google Cloud Platform.

> **" TMSTH enjoys the benefit of the modernized application which develop on Google Cloud Platform with scalable, reliable, high performance cloud infrastructure while offering industry leading services to its clients. "**
