

Dream Games - Auto-Scalable, Fault Tolerant Data Platform

Oredata partnered with Dream Games to develop an in-game event collection infrastructure on Google Cloud Kubernetes, allowing for real-time data collection and analysis.

The challenge

Reliability and scalability are two key challenges in the gaming industry when it comes to infrastructure. With millions of players from all over the world, game developers must ensure that their systems are always available and can handle the large volumes of traffic that are generated during peak times. This requires the use of powerful, scalable technologies and robust, fault-tolerant systems.

The solution

A solution has been developed that collects and analyzes game data in real-time. The solution uses Kubernetes and Google Cloud's serverless solutions to provide a secure, efficient, and cost-effective infrastructure to collect and analyze game data. It can automatically scale to handle large amounts of requests and provides valuable insights to marketing and game design departments.

The results

Dream Games has implemented a solution on Google Cloud to collect data. This auto-scalable, fault-tolerant solution provides a reliable platform for handling large amounts of data and automatically adjusting capacity as needed. This solution allows Dream Games to effectively and efficiently collect data, even during peak traffic times, and gain valuable insights to enhance the gaming experience.

“ Working with Google Cloud has been a great experience for us at Dream Games. Their auto-scalable, fault-tolerant solution has provided us with a reliable platform for collecting and analyzing data in real-time. This has allowed us to quickly identify trends and patterns, providing valuable insights to enhance our gaming experience. ”

Hakan Saglam, CTO, Dream Games

About Dream Games

Dream Games is a leading mobile gaming company founded in 2019. Dream Games' objective is to combine technology and creativity to develop high-quality mobile games that will be played for years. Dream Games is dedicated to crafting high-quality games that are easy to pick up and play, providing hours of entertainment for gamers of all skill levels.

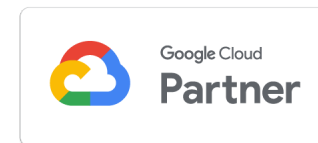

Industry: Gaming

Primary project location: Turkey
