

Ufonia - AWS to GCP

Provisioning landing zone and migrating migration of all the microservices on EKS and other AWS services to GCP. Automated workflows Implemented auto-sync of secrets Built data pipelines Migrated Metabase dashboards to Looker studio

The challenge

Ufonia was operating their automated telephonic consultation system on AWS. They sought to migrate to Google Cloud for improved security, scalability, and to leverage existing Google services Cloud Foundation Establishment Consolidation and Optimization Architectural Improvement Accelerated Onboarding Data Management and Security Data Privacy and Security Advanced Analytics Change Management

The solution

Migrating microservices to Google Cloud Leveraging CDKTF to decouple AWSCDK from CDK8S Ensuring accelerated onboarding Enabling robust data management Enabling advanced analytics Building future-proof architecture

The result

Enhanced Security and Scalability Streamlined Deployment Process Consolidated Cloud Environment Automated Operations Future-Proof Architecture

Ufonia folks have been supportive and worked very closely with Searce tech team. It seemed like we are part of the same organization. There were several occasions where we actually experience real partnership and hunger of actually solving and getting things done

About Ufonia

Ufonia believe a diverse team is key to building products that best serve the needs of all patients. Together, they combine a wide range of background experiences from hospital clinicians and managers to software engineers, machine learning scientists, and designers.
