GIGABYTE and CloudMile Collaborate on Cloud Training Programmes

CloudMile, a Google Cloud authorized training partner, provides GIGABYTE a 2-day GCP onsite lectures including core infrastructure and Big Data fundamental to enable 20 technical persons from IT, R&D management, and AI departments.

The challenge

As a provider launching multiple computing solutions, GIGABYTE is eager to equip its employees with the latest cloud technologies and best practices, Big Data and AI solutions in particular.

The solution

For GIGABYTE, CloudMile designed courses covering Google Cloud infrastructure, big data, and machine learning. These included an introduction to Google Cloud core infrastructure, Identity and Access Management (IAM), storage and data warehousing, network architecture, container management, monitoring. Comparison for different ML tools and Vertex AI benefits are also covered via lectures and labs.

The result

For R&D departments, the courses equipped them with different GCP engines including App Engine, GKE, microservices management, which can help them to enhance management costs compared to traditional VMs. For AI departments, multiple AI tools, Vertex AI, GenAI, and BigQuery built-in AI models, are introduced, which they find very helpful and impressive.

> " Thanks to CloudMile for providing solid and high-quality training, which broadens our colleagues' technical breadth and knowledge. We look forward to more collaboration in the future. "
>
> Max Cheng, Leader of Digital Platform Division, GIGABYTE

GIGABYTE

About GIGABYTE

GIGABYTE Technology is a Taiwanese manufacturer and distributor of computer hardware. It offers a comprehensive product lineup covering consumer, business, gaming, and cloud systems markets and stands as a beacon of excellence in the realm of computer hardware, high-performance servers, and workstations.
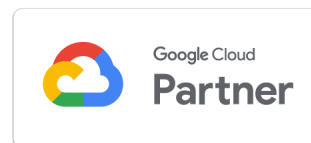

Vertical/horizontal solution: Manufacturing & Industrial

Primary project location: Taiwan
