

Payments unicorn PPRO - powered by Google Workspace & Wabion

With its Google Workspace expertise, Wabion supports fast-growing PPRO to onboard new employees, integrate acquired companies and make sure that the group-wide collaboration platform is up to date in terms of security.

The challenge

Expanding its global network of local partnerships to enable local payment methods, PPRO's previous on-prem collaboration solution was too expensive, too unstable and required too much workforce for the administration. The new setup would have to meet the requirements of a fast-growing, globally active and cloud-native enterprise in terms of scalability, flexibility and security.

The solution

Google Workspace prevailed in a comprehensive evaluation. After a smooth migration from the previous on-prem solution to Google Workspace, Wabion helped PPRO optimize its new collaboration solution based on a customized optimization program. Wabion also led the successful integration of separate Google Workspace environments of acquired companies into a group-wide collaboration platform.

The results

Based on the experience from projects migrating thousands of users and TBs of Data, Wabion guided PPRO through a crucial phase of its business development. Today, Google Workspace is a central pillar of PPRO's IT infrastructure and working culture. When needed, Wabion assists PPRO with ad-hoc support, training for new staff or technical workshops such as the Google Workspace Security Assessment.

“Wabion worked with us during a crucial stage of our business development and helped us ensure that our IT setup keeps up with our fast growth. Thanks to Wabion, our staff uses Google Workspace independently, but can count on Wabion if needed. For PPRO's multi-cloud-journey, it's important to have Wabion on board covering the entire Google Cloud and Google Workspace offering with their expertise.

”

Ralf Amrein, Global Head of IT, PPRO
