

Meridian Infotech Limited

We have migrated their 8 different domains in 3 consoles. Email, calendar, contacts, and Drive data were migrated. We also helped them in creating SOPs to configure their end-users computers

The challenge

Customer had 8 different domains, out of which 6 were on G Suite basic and two were on G Suite standard. They are into the mining business and have a presence in Africa. They wanted to consolidate all the domains for the ease of administrative and billing management.

The solution

We have prepared 3 different consoles to migrate all the users from different consoles. It was g suite to g suite migration. The scope was to migrate Email, calendar, contacts and Drive migration.

The results

The domain consolidation project was successfully completed in 25 days.

Meridian Infotech has multiple offices abroad, expanding IT infrastructure to various locations. The deployment with Searce achieved a manageable and centralized infrastructure to maintain users & resources from 8 different domains under 3 different consoles. Searce helped Meridian have smooth implementations, manage processes and control resources within the user base across multiple locations.
