Boston Partners migrates from Google to Google for Nonprofits

Wursta implemented a Google to Google for Nonprofits migration. Google is one of Boston Partners' main operating systems, so it was essential that they make this transition as smooth as possible. Wursta provided security and cloud expertise as well.

The challenge

Boston Partners planned to relocate their headquarters at the beginning of 2020. This move was not just about building space; the company they were housed with, JSI, managed Boston Partners' IT infrastructure. JSI would no longer be managing that in the new space. Then, when the pandemic began, Boston Partners had to completely shift their focus and become more self-sufficient in the cloud.

The solution

Joe Wilson, Technical Delivery Manager at Wursta, was able to set up the Boston Partners team with a Google to Google for Nonprofits migration, seamlessly transitioning the team onto their own instance. Because all aspects of Boston Partners' IT infrastructure were managed by JSI, Wursta helped with not only data migration but domain ownership as well.

The results

Wursta's Joe Wilson was generous with his time and expertise in educating Boston Partners. Specifically, Joe advised the team on security issues and helped set up 2-Step Verification. Jim Laudisio, COO of Boston Partners, wanted his team to be more self-sufficient with their management of the cloud, and Wursta has helped them achieve that.

> " Annually, we recruit about 600 volunteer mentors – all of whom will need to be interviewed and trained online rather than in-person this year. In a typical year, we reach nearly 4,000 students in the Boston Public Schools, but given the increased need for mentor services right now, that number could increase. Google Workspace will play a role in helping us achieve all of this. "

> Chris Cotrone, Director of Marketing at Boston Partners.

About Boston Partners In Education, Inc.
Boston Partners in Education has been providing aid to public schools in Boston for over 50 years. They match students in grades Pre-K through 12 with an academic mentor to support their academic achievement and socio-emotional growth. They do this by providing students with focused, individualized volunteer support.
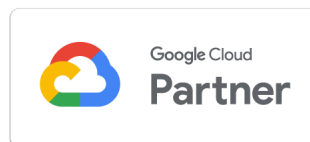

Industry: Education

Primary project location: United States

About The Wursta Corporation
Wursta helps organizations maximize their use of the Cloud through a holistic methodology, Collaboration Design, which focuses on customer success.
