

Migration To Cloud For A Multinational Pharma Company

Niveus worked closely with the client's team to meet the end goals that include creation of landing zone, infrastructure migration from data centers to Google Cloud.

The challenge

The client intended adopting GCP to provide greater value to their customers, for stronger security posture & innovate with greater flexibility as they scale. They wanted to modernize their workloads in their Basel, Princeton & Germany data centers through lift-and-shift. They wanted to realign their existing projects to a new landing zone and use Netapp Cloud Volumes.

The solution

The current footprint of data centers, planning out the migration and making the transition to the cloud was achieved with the help of Stratozone. Through lift and shift approach they were able to right size their VMs and improve their utilization. File servers were migrated to Netapp Cloud Volumes servers hosted in GCP using Netapp migration tools.

The result

With the help of Niveus, 248 VMs were successfully migrated to the Google Cloud Platform. Assisted in setting up iHub application, that serves around 5000-7000 daily active users across North America, Russia and Europe.

“ Niveus worked closely with our team to help us achieve our end goals of creating a landing zone, infrastructure migration from data centers to GCP and planning out the migration process. Niveus also helped us right sizing our VMs and improve their utilization, which has greatly benefited our business. ”

Ritesh Mishra, Global Head IT Infrastructure - DRL

About Dr. Reddy's Laboratories (DRL)
