

Transforming collaboration with Sysmo Sistemas

Migration and training: tools and security adoption

The challenge

The client's main challenge was the need of a high volume mail through its Enterprise Resource Planning [ERP] system. Customer had a problem with collaboration, needing more interaction between users and shared drives to replace what they had in the previous provider, mainly with limited storage.

The solution

The solution for the customer's main pain, the high volume of messages, was the use of the simple mail transfer protocol relay [SMTP] of the Google Workspace, the plan chosen met the need for storage and collaboration tools.

The results

Improved collaboration, control and security in employee communication, greater storage space on the drive. Gmail Security Setup and advanced filters features enabled for anti-spam.

The client achieved the desired Enterprise Resource Planning [ERP] message volume and also the change in the collaboration mindset, as well as a significant reduction in the volume of spam received in the employees' inbox.
