

Yogame Studio Joint Stock Company

HVN consultants have provided valuable guidance on how Google Workspace can assist users in efficiently managing data and leveraging the importance of digital technology in the era of Industry 4.0.

The challenge

With an increasingly large amount of data, Yogame has difficulty with limited capacity to store and difficulty in finding and managing data. At the same time fear that important data may be lost at any time. Applications that are incompatible with each other interfere with the work process.

The solution

Store files and documents online securely, automatically backing up to ensure that important data is never lost. Manage access rights for members of your organization in Shared Drive: Minimize data loss and prevent access to organizational resources from external users.

The results

With Google Drive, Yogame can comfortably store data without worrying about the space being full, manage and easily find documents without worrying about losing. In addition, with a rich set of tools including Gmail, Google Docs, Google Sheets and many more, Yogame has enhanced collaboration and enhanced work productivity. People can access, edit, and share documents from everywhere and devices.

“ Thanks to the consultants of HVN Group and the timely support of Ms.Nhung - Sale Executive on the ability of cloud storage as well as backup and restore of Google Workspace. This makes it easier for the company to manage the work in the daily working process. ”

Mr. Anh Nguyen - IT Support
