

9Rooftops- Google Workspace

9Rooftops worked with Woolpert Digital Innovations to develop a solution that would enhance their business workflows.

The challenge

The company needed to consolidate billing accounts into a unified system to streamline financial processes and better resolve discrepancies.

The solution

9Rooftops implemented a host of Google Maps Platform APIs to improve their business operations. 9Rooftops also deployed a managed browser service & password manager under Google Workspace to streamline IT operations, improving security over field activities. This strategy helps monitor Google & Microsoft Office suite usage so workspaces could be better tailored to client & employee preferences.

The result

9Rooftops successfully navigated the implementation process and optimized workflows to foster a creative and collaborative environment. This strategic integration positions the company to continue expanding their services and strengthens their commitment to creativity and client satisfaction.

“The collaboration has been exceptionally easy. Woolpert demonstrated proactive support, particularly in troubleshooting billing issues.”

Gary Graham, Application Analyst at 9Rooftops
