

SAP and Point of Sale Migration to GCP

Zoi was the implementation partner in the project and helped to migrate the customer's SAP S/4HANA, SAP Process Orchestration (PO) middleware and ComerZZia Point of Sale (PoS) software to the Google Cloud Platform.

The challenge

The renewal date of Ametller's on-premise SAP licenses was approaching and a hardware change was needed in order to cope with their growing business. Migrating to the cloud addressed both of these issues, but they needed an experienced partner to guide them.

The solution

GCP was chosen as the cloud provider after evaluating different hyperscalers, and concluding that Google was the best partner for the company's cloud and data strategy. It also provided the scalability they needed to cope with growth without the need to constantly replace hardware. In addition, GCP provides some excellent coverage for retailers such as a 99.99% uptime SLA.

The result

Over the course of 4 months, Zoi helped Ametller to migrate their on-premise SAP ERP instances, including setting up SAP S/4HANA and PO, and ComerZZia PoS software on the Google Cloud Platform. A migration "dry run" to detect and correct potential bugs was performed, followed by the production environment migration. Zoi also provides Managed Services for the customer.

“ Migrating to the cloud with Zoi has been a great success. In addition to their great technical expertise, we value their agility and ability to integrate with our internal teams. Good teamwork between Zoi and Ametller has allowed us to take a significant step forward in the quality of service that the company needs in terms of IT infrastructure. ”

Daniel Salvat, CIO, Ametller Origen

AMETLLER ORIGEN
