

Work Transformation-KIFS Housing Finance

Sonata helped KIFS realize the Collaboration capabilities of Google Workspace and improved their business continuity. Enterprise-Class Mail Encryption, Advanced Malware Protection, and reporting were also set up.

The challenge

KIFS wanted to ensure safety, security, and compliance for their employees on the field and their existing On-Prem traditional applications lacked the flexibility and agility required to support real-time delivery. Their existing mailing solution lacked collaboration capabilities and co-authoring of documents.

The solution

Sonata assisted KIFS to deploy Google Workspace. Workshops were conducted focusing on workplace transformation where tools like Gmail, Meet, Collaboration Tools, and Drive were demonstrated. Mailing tools like Archiving, Mail Policies, and DKIM/DMARC were introduced, and Enterprise-wide Mail encryption, Multi-Factor Authentication, and Mobile Device Management were enabled.

The results

With tools like Google Docs, Forms, and Google Sheets tasks like sales forecasting were centralized, reducing the time required to complete and update reports from a week to 2 hours. With tools, like Google Calendar, teams could easily collaborate and improve productivity. Enterprise-class Mail Encryption and Advanced Malware and Protection helped protect users from malware.

“Sonata's workshop on the Google apps was critical in transforming the way we work. The team now utilizes the full capabilities of Google Meet for our internal communications.”

Aditi Kelkar, HR Manager, KIFS Housing Finance
