

## Guangdong OPPO Mobile Telecommunications Corp.,Ltd.---Migration

Baidao can clarify the requirements, make a complete environment assessment, and select proper Migration Solution. Afterwards, Baidao will work out a specific business plan including architecture design,VM migration,Databases migration and so on.

### The challenge

OPPO's mobile photo album service provides services to end users around the world. It is the top priority of OPPO to improve user experience by reducing the access delay of users to resources and improving the access hit ratio of resources.

### The solution

A VPC can connect to the Google network across all regions, minimizing downtime during migration, reducing network infrastructure costs, and enabling customers to use your resources more flexibly. The network covers more than 200 countries and regions, with 34 areas and 103 available areas, and the uptime is 99.99%.

### The results

This helps customers solve the problem of high resource return rate and low hit ratio. After the customer migrates resources to GCP, the cache hit ratio reaches 99.92%.

OPPO, the largest handset maker in China, migrated from AWS to GCP, giving GCP a benchmark customer.
