

Crafting better environments with Google Cloud and DoiT

Supporting PaperCut's partnership with Google Cloud, offering specialized support, technical expertise, and access to certified professionals. DoiT retooled PaperCut for the cloud, resulting in innovative software solutions for sustainability.

The challenge

The challenge was to promote sustainable printing practices globally. Partnering with Google Cloud and DoiT, they gained essential technical expertise, support, and guidance to retool their mindset and skillset for the cloud. This collaboration empowered them to create innovative software solutions, reducing paper waste, saving costs, and crafting better environments for all industries.

The solution

DoiT offered specialized support, technical expertise, and access to certified Google Cloud professionals to help PaperCut retool their mindset and skillset for the cloud. Their collaboration facilitated the development of innovative software solutions for sustainable printing practices.

The result

PaperCut achieved success in providing sustainable printing solutions. They reduced paper waste, saved costs, and improved environments for 80,000+ organizations across 162 countries. DoiT's expertise empowered PaperCut's developers to excel in cloud technology, leading to better software solutions and customer satisfaction.

The highlight was PaperCut's successful partnership with Google Cloud and DoiT. Leveraging their expertise, they crafted innovative software solutions, reducing paper waste and benefiting 80,000+ organizations globally.

About PaperCut
