Improving Grupo Petroprix's customer experience with Google

uCloudStore has accompanied Petronics Tecnología in the implementation of Google Workspace for all the Group, helping migrate their infrastructure to the Cloud, in order to professionalize their technological resources.

The challenge

The Group was growing at a fast pace in operational terms. With the increase of the business volume, they started to experience problems with their servers. Their need was to grow sustainably, in an organized way, to provide the best service to their customers and ensure the scalability of their businesses, all through the improvement of their technological resources.

The solution

Working with Google Cloud provided Petronics with strong security, interface functionalities and usability among employees. uCloud conducted an analysis of the needs each department had in terms of technological resources, and assessed the customer on which Google Workspace product would suit best for each Group's business line, enabling them to overcome their challenge.

The results

Since the project was completed, Grupo Petroprix could increase the productivity of its operations thanks to Cloud technology, focusing on creating the best experience for their customers.

> Migrating to Google Workspace has enabled Grupo Petroprix to sustainably scale its business. The uCloud team assisted the company on which was the best solution, enabling the project to be completed in an efficient and satisfactory way.
