

How Galeri 24 achieved agile & future-proof IT infrastructure

Devoteam G Cloud's team took the role of consultants and guides in the process, and assisted Galeri 24 on every step of the switch to GCP.

The challenge

Galeri24 faced a major challenge with their IT infrastructure. Previously, they used a combination of on-premise server & Virtual Private Server, they were struggling to maintain seamless operations. It took approximately 1 week to implement It's also difficult for their team to conduct experiments. Moreover, their IT team was lacking the resources & knowledge to manage their IT infrastructure.

The solution

Devoteam proposed lift & shift as well as application modernisation solutions that would take Galeri24's infrastructure to the cloud. With the Google Cloud, the IT team was able to conduct experiments & test new technologies with ease. Devoteam also transfers its knowledge to the Galeri 24 team through periodic check-points and workshops.

The results

Galeri24 was able to reduce their technical debt, ensuring their IT infrastructure was ready for the future. This allowed their business to operate more smoothly. In terms of duration, Galeri24 can reduce time from one week implementation to one day (or even less). Galeri 24 also successfully freeing up resources and knowledge for their IT team to focus on driving business growth.

“ The adoption of cloud native technologies has been a major boost for Galeri 24, providing it with the flexibility and scalability required to meet its growing business needs. And with Devoteam's ongoing support and guidance, Galeri 24 can be confident that it is making the most of this transformative technology. ”

Jauhar Rochman (Head of IT Operational Department, Galeri 24)
