

Teaching Transformed with Google Workspace and Chromebooks

CloudEDU met regularly with school management and the IT integrator to develop a strategy for transforming teaching and learning with technology. Touch points included teacher and Google Workspace Administrator training, and support for Chromebooks.

The challenge

The school faced a lack of expertise among teaching staff on how to integrate technology into teaching and learning while supporting effective pedagogy. School management wanted to create a safe environment for hybrid learning, and needed devices that fit in seamlessly into the Google Workspace environment. They also wanted to reassure parents that the devices would be both secure and affordable.

The solution

CloudEDU configured Workspace to create an easy-to-use technology infrastructure for the school. Training by CloudEDU fostered adoption of Workspace apps for teaching and learning. Google Workspace Admin training ensured a smooth deployment of Chromebooks and the CEU license creating a safe learning environment. Guidance for the school's ed tech coach nurtured effective teacher implementation.

The results

Together, Chromebooks and Google Workspace encouraged true integration of technology into everyday classroom teaching and learning. Chromebooks and Workspace have shown how digital collaboration is evolving classroom practices, shifting the focus of educational technology from students merely consuming content to their creation of knowledge where they demonstrate their understanding.

“ CloudEDU’s support and training on how to manage and operate the Google Admin Console and the guidance on best practices in classroom adoption have been invaluable. I know that the advice given is sound, tried and tested, and set against an international benchmark. Their smooth-running ChromeStore helps me know I am giving our schools’ parents the best most, cost-effective solution for devices. ”

Louise Nvision, IT Integrator, Cannons Creek Independent School

About Cannons Creek Independent School
Cannons Creek Independent School is a co-educational school catering to learners from Grade RR to Matric and is staffed by passionate professionals. The school aims to make learning relatable and interesting, with real-world applications where students practice critical thinking, peer-teaching, research techniques, and creative presentations.

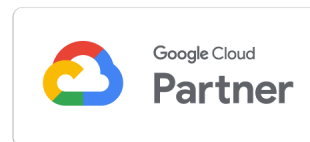

Industry: Education

Primary project location: South Africa

About CLOUD EDUCATION SOLUTIONS (PTY) LTD

CloudEDU's educational technology experts help schools develop collaborative, purposeful, and technology-rich learning environments.
