ASPEN DENTAL MANAGEMENT, INC.

Cloudreach Helps Aspen Dental Migrate to GCP

Through this engagement, we were able to move Aspen Dental to a more modern mode of operating that is ready for capabilities and pace that accompany cloud, while also avoiding the common pitfalls.

The challenge

Aspen Dental engaged with Cloudreach to support the migration of their workloads to Google Cloud Platform. They wanted to ensure their cloud environment had a robust governance, and where possible to reduce the overhead of their teams through automation.

The solution

Our Cloud Migration Service is designed to accelerate their adoption of Google Cloud with a comprehensive strategy, combining our world-class software platform, Cloudamize, and a methodology that gave our customer the ability to not just move to the cloud but to be transformed in the cloud and leverage cloud-native technologies to set them up for success.

The results

We were also able to: • Deliver improved application resiliency through leveraging Google Cloud Platform. • Facilitate the customer's self-sufficiency with Google Cloud – improving their organizational agility. • Enable their teams to focus on higher value work through leveraging many of Google Cloud's managed infrastructure services.

> Cloudreach helps Aspen Dental to not just migrate to the Google Cloud Platform but to also leverage cloud-native technologies.

ÅspenDental
