

Invivo Lab achieves business goals with Google Workspace

Accompanying and supporting Invivo Lab in digital transformation strategy, making the most of Google Workspace features.

The challenge

Given the nature of the job, Invivo Lab requires a stable email system to ensure safe and seamless work. In addition, it is necessary to add safe and flexible data storage, sharing and data management features. Bringing maximum efficiency to working with partners globally.

The solution

Infolinks advised Invivo Lab on the most suitable version of Google Workspace, including the most appropriate features within its ecosystem (Gmail, Drive, Meet, Calendar, etc.), to equip employees with powerful tools to support their daily tasks and meet business security requirements.

The result

Invivo Lab always keeps up with the latest health care trends with progressive medical applications to bring customers the best experience.

“ Infolinks and Google Workspace have been instrumental in streamlining Invivo Lab operations, enabling the company to focus on expanding its sales and after-sales services. With the support of these powerful tools, Invivo Lab has been able to achieve its goals more efficiently and effectively. ”

Ms Thuy Vu - Account Manager - Invivo Lab

Invivo Lab
