

AMP Systems - Innovative Platform for Real Estate MLS and Brokers

Declarative Cloud consulted with AMP Systems to understand their business and technology goals of supporting business growth, and providing an innovative and secure platform for Multiple Listing Services and Brokers in the Real Estate industry.

The challenge

As the industry-leading open architecture platform in the Real Estate industry, it is critically important that AMP provides a secure, resilient, and efficient platform to their customers. It's equally important that the AMP team stays focused on providing innovative solutions in their industry with efficient management of their cloud infrastructure and operations.

The solution

Declarative Cloud reviewed AMP's environment, conducted an in-depth security assessment, identified opportunities for cost optimization, and provided billing and technical support to enable the company's growth and investment in innovation. Our team focused on infrastructure hardening with recommendations for IAM roles, Networking, and GKE security using the Google Cloud Architecture Framework.

The result

By taking a customer-centric approach, Declarative Cloud developed a deep understanding of the customer's business and technology needs that enabled us to provide customized suggestions for enhanced security, reliability, and cost-effectiveness. As a result, the AMP team is able to deliver on its mission of an innovative data services and applications platform for the Real Estate industry.

“The expert guidance from Declarative Cloud has enabled our team to focus on our core mission of empowering MLS and Real Estate Brokers. They have provided proactive recommendations ensuring that we have a secure, resilient, and fast Google Cloud infrastructure to support our growth and enable our customers.”

Paul Hethmon, CTO, AMP Systems

About AmpTech LLC

AMP Systems provides enterprise solutions for Real Estate across North America. They empower Multiple Listing Services (MLS) and Brokers to control their data services and application offerings without an intermediary. AMP offers a leading technology framework that is the industry standard for open-architecture platforms.
