

# Managed Detection and Response for Dentsply Sirona

Managed Security Service Provider for core business application running on Google Cloud leveraging Security Command Center (SCC) Premium and Chronicle SecOps Suite.

## The challenge

The customer faced challenges integrating SIEM into their multi-cloud environment. Their dynamic, agile setup required modernizing autonomous security operations with Chronicle to enhance the integration between Security Command Center (SCC) Premium. They faced tight timelines, continuous new integrations, and the need to improve and operate simultaneously.

## The solution

Our Eviden Managed Security Services implemented and managed threat detection and response via our managed Security Operations Center with Chronicle and SCC-Premium, enabling rapid detection of attacks across their GCP environments. Chronicle and SCC-Premium streamlined log integration and leveraged native Google security services for effective threat detection and response to prevent attacks

## The result

The customer gained substantial transparency into their security posture through our managed Security Operations Center (SOC) enhanced detection and response offering, powered by Google Chronicle and SCC-Premium. Close collaboration with Google and Eviden ensured success and established us as a trusted security advisor and managed security service partner.

Eviden partners with Google to integrate the Chronicle SecOps suite and SCC-Premium into Dentsply's existing SOC processes, serving as their SIEM/SOC platform for security incident management. As a leading MSSP, Eviden also fully manages their SIEM/SOC service. Additionally, Eviden employs Google Chronicle to deliver managed detection and response for Dentsply.
