

# Bloomreach

Foresite leveraged their engineering and security practitioner experience to guide Bloomreach through the deployment and implementation of Google SecOps, including data onboarding, rule creation, and enablement.

## The challenge

Bloomreach sought to enhance their security posture by deploying Google SecOps to improve functionality and scalability for their security operations.

## The solution

Foresite provided comprehensive consulting and implementation services for Google SecOps. This included use case development, integrating key data sources, and developing custom parsers for unsupported log types.

## The result

Bloomreach successfully deployed Google SecOps with Foresite's assistance.

“ Foresite's expertise in Google SecOps was invaluable. Their guidance and support throughout the implementation process were critical to our success. ”

Chris Talevi, Director of Security Operations, Bloomreach
