

Alphabeto - Confeções Children / Colaboração unificada

Perform migration, perform change management and meet specific security and data protection needs.

The challenge

Due to the low budget at the beginning of the project, it was decided to carry out the implementation of the Workspace only for a part of the company in the first phase, the other part of the company would remain in the old provider. Customer had a problem with collaboration and anti-spam from the old vendor and they needed to share the drives to replace what they had on file server.

The solution

Due to this scenario, it was necessary to configure a mixed environment, using email routing between gmail and the old provider at the customer's request. Then there was the implementation for the rest of the company, as seats were hired to bring everything to Google, the migration of the organization's total data from various sources and collaboration and security training was also carried out.

The results

Now all emails are on Google workspace, all users were trained, and the company's technology team is able to better manage their admin panel, thanks to security training with Sauter team.

Now there are no more anti-spam issues due to the high reliability of gmail's artificial intelligence. Everything is unified in the same environment and now they have both the technical team and the team in general able to use the tool in the best way.

About Confeções Children Ltda

It's the little ones who inspire us to create a world full of colors, transforming all that imagination and color into light and comfortable clothes to play a lot! Every detail is very well thought out to be part of the moment most important in life: childhood.
