

Chingari Migration

Wohlig was responsible to migrate the entire infra from AWS to GCP with minimal to no downtime

The challenge

The AWS account of Chingari was going to be suspended within 4 weeks.

The solution

Along with GCP Team, Wohlig accelerated the migration with fast track foundation and discovery sessions and parallelly worked on migration setup. we migrated their apps in kubernetes autopilot and databases were migrated using DMS and cloud storage using STS also implemented APM for performance optimisation along with cost optimisations

The result

Entire Infra moved before AWS being suspended
Cost savings
Performance improvements with autoscaling
Security Optimisations
Once click Deployments with CI/CD

Chingari successfully migrated from AWS to Google Cloud in just one month before AWS account being suspended. This migration helped Chingari to save costs on infra and also gave added security and support along with advanced monitoring tools like APM & improved performance.

About Chingari

Chingari is a popular India-based short video sharing platform designed to showcase talent through quick, engaging videos. It has over 50 million users and has been awarded as India's #1 Social Networking App. It aims to inspire and empower users by offering a space to express creativity, connect with content they love, and gain recognition.
