

J.B. HUNT TRANSPORT, INC.

J.B. Hunt Transport, Inc.

Migrated 1,000 virtual machines, 90 Kubernetes clusters, 915 Kubernetes nodes, 27,000 pods and 500 databases—from Azure to Google Cloud.

The challenge

Due to their architecture, tools, and talent, they reduced a six to nine month project plan down to six weeks of execution.

The solution

In the end, they executed the shift in only 35 business days with zero down-time. The team will continue to optimize their environment to reduce waste and assure the performance of their applications.

The result

Migrated 1,000 virtual machines, 90 Kubernetes clusters, 915 Kubernetes nodes, 27,000 pods and 500 databases—from Azure to Google Cloud.

“When we implemented the Google Cloud integration following the first GA release, [...] We executed on some of the recommendations, and it worked really well.”

Robert Auten, Senior Expert Software Engineer, Cloud Operations, J.B. Hunt
